4:10pm ▷ 4:30pm	Coffee Break	
4:30pm ▷ 5:30pm	Panel Discussion	All Speakers
5:30pm ▷ 5:40pm	Closing Remarks	

Museums used to be considered as places for preservation and exhibition of the tangible cultural heritages. But now museums are becoming places for people to meet and transmit collective memories from one generation to another. The concept of memory is one of the central focuses in museum activities including researches. The Forum will examine various aspects of 'memory and the museum' and thus clarify the function of the museum as an institute for transmitting and creating 'memories'.
